

Wireless 4K camera

The wireless 4K camera will be integrated inside the Q-Flow surgical light - it doesn't complicate the usability of the light. Rotation, zoom and other functions provide good and easy visibility to the operating area. Wireless transmission enables live video feed to external monitors e.g. in training or consulting.

- Camera unit "hidden" inside the luminaire - no additional parts underneath
- Can be attached to Q-Flow Vision and Intelligent luminaires - even retrospectively
- Excellent video stream quality
- Camera controls integrated into the same luminaire user interface - no need for additional control units
- Merimote™ and OpenOR™ compatible

Technical Specifications

Product code	5202723
