

K-Tek 350 stirrup pair 12806

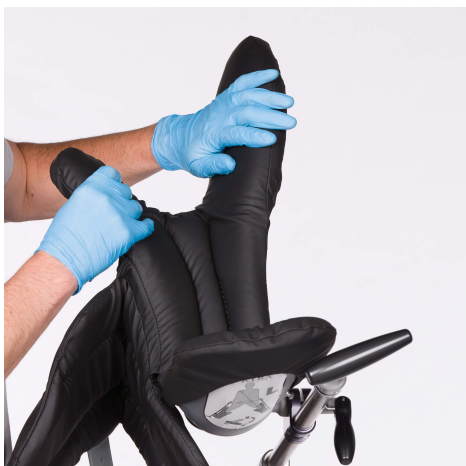

The K-Tek Comfort Stirrups for patient positioning for a wide range of gynecologic, urologic and laparoscopic procedures. The Stirrups increase surgeons' operating room performance by permitting simple adjustment of lithotomy and abduction intra-operatively. The K-tek Comfort 350 stirrup is designed for patients with a BMI of less than 29 with a large flexible lateral fin and can support patients up to 159 kg weight capacity.

- Designed to relieve pressure with soft padding that encapsulates the foot.
- K-TEK™ silicone closure straps making cleaning easy.
- Flexible finned boots accommodates various leg sizes.
- Superior access with lithotomy range of motion from -55° to +85° aids in relieving clinician shoulder/arm strain.
